

WELLEM MELLO DE LAYRA

Senior Java Developer | Full-Stack | Cloud

CONTACT

Rio de Janeiro, RJ, Brazil
+55 21 99040-3514
wellemlyra@gmail.com

KEY SKILLS

Java 21 and Spring Boot
React 18+, Next.js and TypeScript
Clean Architecture and SOLID
REST APIs, GraphQL and microservices
Docker and Kubernetes
Cloud: AWS and Azure
GitLab, CI/CD and Git
MongoDB and relational databases
Testing and code review
Observability and performance

EDUCATION

Systems Analysis and Development
Estacio de Sa University - 2023

LANGUAGES

Advanced English - CCAA

COURSES

Git - Udemy (2023)
Reactive Microservices with Spring Boot - Udemy (2023)
TypeScript - Udemy (2023)
RabbitMQ - Udemy (2022)
AngularJS - Udemy (2022)
Amazon DynamoDB - Udemy (2022)
JSTL + Hibernate - T2Ti
JSF + Hibernate - T2Ti
UML and Data Modeling - Oracle

PROFESSIONAL SUMMARY

Senior Java / Full-Stack Developer with a career focused on the development, evolution and support of high-criticality enterprise applications. Experience with Java 21, Spring Boot, React 18+, Next.js and TypeScript, REST APIs, integrations and microservices in large-scale environments.

Skilled in Clean Architecture, Hexagonal Architecture, SOLID, code review, unit and integration testing. Hands-on experience with AWS/Azure, Docker, Kubernetes, CI/CD, observability and performance, collaborating in agile Scrum and Kanban teams.

TECHNICAL SKILLS

Backend and architecture

Java 21 and earlier versions, Java EE, Spring Boot, REST, SOAP, GraphQL, microservices, Clean Architecture, Hexagonal Architecture and SOLID.

Frontend

React 18+, Next.js, JavaScript, TypeScript, Vite, Context API, TanStack Query, Tailwind CSS, Shadcn/ui and Radix UI.

Data and quality

MongoDB, PostgreSQL, SQL Server, DynamoDB, unit and integration testing, Jest, Playwright, code review and Fortify.

Cloud, delivery and collaboration

AWS, Azure, Docker, Kubernetes, Git, GitLab, Jenkins, CI/CD, Keycloak, observability, performance, Scrum and Kanban.

PROFESSIONAL EXPERIENCE

Qintess

08/2025 - 07/2026 | Full-Stack Developer / Programmer

- Developed, enhanced and supported full-stack applications using Java 21, Spring Boot, React 18+, Next.js and TypeScript, including integrations with Java EE, EJB, JAX-RS and Angular systems.
- Performed technical analysis and contributed to the design of REST and GraphQL APIs, integrations and scalable microservices, applying Clean Architecture, Hexagonal Architecture and SOLID principles.
- Built interfaces with Vite, Context API, TanStack Query, Tailwind CSS, Shadcn/ui and Radix UI; managed state with Zustand, Effector and Redux.
- Promoted code quality through code reviews, unit and integration tests, Jest and Playwright; worked with MongoDB and SQL Server, including stored procedures and triggers.
- Managed version control and delivery with Git, GitLab, Jenkins and CI/CD; worked with AWS/Azure, Docker, Kubernetes and Keycloak, focused on observability, performance and troubleshooting.
- Participated in Scrum ceremonies and Kanban workflows, contributing to continuous improvement in engineering and application support practices.

Technologies and practices: Java 21, Spring Boot, React 18+, Next.js, JavaScript, TypeScript, REST APIs, GraphQL, Vite, Context API, TanStack Query, Tailwind CSS, Shadcn/ui, Radix UI, Zustand, Effector, Redux, MongoDB, SQL Server, GitLab, CI/CD, Kubernetes, AWS, Docker, Keycloak, Jest and Playwright.

Globality IT

03/2023 - 07/2025 | Senior Systems Analyst / Java Developer

Developed and supported RESTful and GraphQL APIs and Open Insurance integrations using Java, Spring Boot and microservices; contributed to technology evolution including Java 21.

- Worked full-stack with React 18+, Next.js, JavaScript and TypeScript, integrating interfaces with APIs and using MongoDB and PostgreSQL.
- Participated in architecture decisions and technical analysis, applying Clean Architecture, Hexagonal Architecture and SOLID to scalable solutions.
- Performed code reviews, unit and integration tests, and vulnerability remediation with Fortify, supporting reliable and secure deliveries.
- Used Git/GitLab and SVN, Jenkins and CI/CD; worked with AWS/Azure, Docker, Kubernetes, OpenShift/Rancher, observability and performance analysis.
- Collaborated in Scrum and Kanban ceremonies, application support and continuous improvement of enterprise applications.

Technologies and practices: Java 21 and earlier versions, Spring Boot, React 18+, Next.js, JavaScript, TypeScript, REST APIs, GraphQL, microservices, MongoDB, PostgreSQL, Git, GitLab, Jenkins, CI/CD, AWS, Azure, Docker, Kubernetes, Fortify, Clean Architecture, Hexagonal Architecture and SOLID.

Stefanini

04/2021 - 02/2023 | Senior Systems Analyst / Java Developer

- Worked in full-stack development, building APIs, integrations and web interfaces with a focus on usability, maintainability and product evolution.
- Implemented screens and components with React, Next.js and Tailwind CSS, integrated with services and relational databases.
- Used PostgreSQL and Git while collaborating in agile teams, including technical communication in English in a professional context.
- Supported cloud environments and delivery flows with CI/CD, Docker and versioning practices, contributing to standardized and predictable deployments.
- Applied concepts related to Java 17+, cloud, Kubernetes, orchestration, infrastructure as code, observability, monitoring and troubleshooting throughout application support and evolution.

Technologies and practices: Java 17+, Spring, APIs, Next.js, React, Tailwind CSS, PostgreSQL, Git, AWS, Azure, Docker, Kubernetes, CI/CD, infrastructure as code, observability, authentication/authorization and troubleshooting.

MJV Technology and Innovation

10/2019 - 03/2021 | Senior Systems Analyst / Java Developer

- Developed RESTful APIs and created and consumed web services through REST and SOAP.
- Created reports for healthcare and dental business areas, supporting operational processes and business needs.
- Performed corrective and evolutionary maintenance of enterprise applications, ensuring operational continuity and continuous system improvement.

Technologies and practices: JSF, Web Services, REST, SOAP, Ajax, J2EE, Java 6/7/8, Spring and JasperReports.

Spread Tecnologia S/A

01/2019 - 09/2019 | Senior Systems Analyst / Java Developer

- Performed corrective and evolutionary maintenance of enterprise applications, focused on stability, continuity and business demand fulfillment.
- Created and maintained applications using AngularJS, as well as REST and SOAP web service integrations.
- Worked with C, C++ and Mainframe technologies, expanding experience in heterogeneous and legacy-system environments.
- Automated applications using Selenium and led a team supporting critical Petrobras contract applications.

Technologies and practices: Struts, Web Services, REST, SOAP, Ajax, jQuery, J2EE, Spring, Spring Boot, AngularJS, Selenium, C, C++ and Mainframe.

Accenture do Brasil S/A

04/2015 - 10/2018 | Senior Systems Analyst / Java Developer

Developed and maintained financial applications, focused on feature evolution, incident resolution and delivery quality.

- Used C, C++ and Mainframe alongside Java solutions, supporting integrations and automation in complex enterprise environments.
- Automated applications with direct interaction with the mainframe platform using Selenium.
- Created and consumed REST web services, developed Java Swing desktop applications and created stored procedures.

Technologies and practices: Struts, Web Services, REST, Ajax, jQuery, Swing, J2EE, Spring, Selenium, C, C++, Mainframe and stored procedures.

K2 Consultoria LTDA

03/2014 - 03/2015 | Senior Systems Analyst / Java Developer

- Developed software for the telecommunications sector.
- Developed and maintained financial applications, working on support, evolution and feature improvements.

Technologies and practices: Spring, Web Services, Ajax, jQuery, JasperReports and J2EE.

Quality Software LTDA

07/2013 - 03/2014 | Senior Systems Analyst / Java Developer

- Developed software for naval fleets, financial applications and collection management.
- Contributed to projects for Tranship, CETIP and TV Brasil, supporting analysis, development, maintenance and enterprise integrations.

Technologies and practices: Struts, Web Services, Ajax, jQuery, JasperReports, J2EE, Java 6/7/8, EJB, JSF and Spring.

Systemplan HR and IT Consulting LTDA

07/2011 - 05/2013 | Senior Systems Analyst / Java Developer

- Developed software for enterprise environments, working in analysis, coding, maintenance and production support.
- Trained new Java programming interns and provided technical support to the team.
- Participated in external audit-control and health/accessibility portal projects for Bradesco Seguros.

Technologies and practices: Struts, Web Services, Ajax, jQuery, JasperReports, J2EE, EJB, JSF, Spring, DWR and Cobol/CICS.

EDUCATION, LANGUAGES AND COURSES

Degree: Systems Analysis and Development - Estacio de Sa University - completed in 2023.

Language: Advanced English - CCAA.

Additional courses: Git, Reactive Microservices using Spring Boot, TypeScript, UX & Design Thinking, RabbitMQ, AngularJS, Amazon DynamoDB, JSTL + Hibernate, JSF + Hibernate, UML and Data Modeling.
